

Military-Grade Rigid Hull Inflatable Boats

Kunjang Shipbuilding Sales Catalogue

2019, Edition 1

Fast military assault craft Ribcraft 14M

Designed for Speed, Versatility and Mission Reliability.

The 14-meter Fast Patrol Vessel is a custom-configurable, very high speed naval platform that can serve multiple mission profiles within a larger fast patrol boat role. The Ribcraft can be employed in an autonomous role or as multiple craft sections or squadrons to disperse coverage, mass effect or operate in concert against concurrent tactical objectives. Accordingly it is an exceptional, high speed, agile boat that can execute extremely sharp turns at very high speed.

This design are currently in service with the Korea Navy.

3D CONFIGURATOR : Colors, Equipment, Engine, etc.

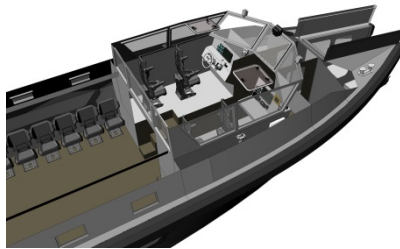

Length Overall: 14.0 meters
Beam Overall: 4.0 meters
Construction: Composite
Range: 400NM
Top Speed: 40+ knots
Cruise Speed: 32 knots
Dry Weight : 8.0 Ton
Capacity: 1700 L
Propulsion provided by: IPS DIESEL 435 HP x 2

We routinely develop custom solutions to meet a specific need. We can customize boats to perfectly fit a mission profile. Customise each element of your boat to ensure a tailored fit to your operational needs.

Product Range

Length Overall: 14.0 – 16.5 meters

Beam Overall: 4.0 meters

Construction: Composite

Range: 400 – 430 NM

Top Speed: 40 – 55+ knots

Cruise Speed: 32 - 35 knots

Dry Weight : 8.0 – 15.0 Ton

Capacity: 1700 - 5000 L

Propulsion provided by: IPS DIESEL or WATER JET

Rigid-hulled inflatable boat RHIB 8.5M

Designed for Speed, Versatility and Mission Reliability.

The Ribcraft 8.5 can be customized to your individual specification whether military, commercial or rescue usage. The 8.5 is capable of extended long distance cruising, her fuel tanks are located under-deck, maximising the console space and lowering the centre of gravity thus improving trim and handling. A field-proven platform, RHIB 8.5M can be precisely adapted by our highly skilled engineering teams to meet every specific need.

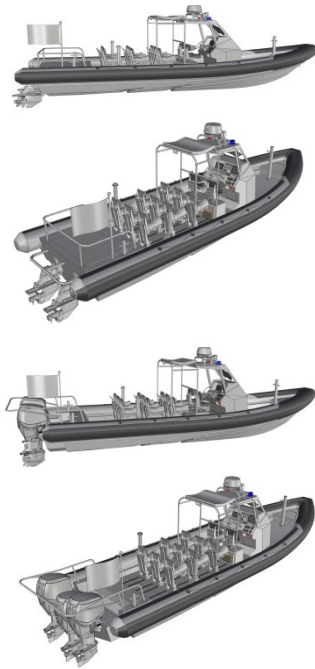

This design are currently in service with the Korea Navy.

3D CONFIGURATOR
: Colors, Equipment, Engine, etc.

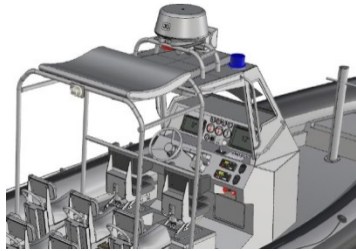

Length Overall: 8.5 meters
Beam Overall: 3.0 meters
Construction: GRP
Range: 240NM
Top Speed: 50+ knots
Cruise Speed: 35 knots
Dry Weight : 2.4 Ton
Capacity: 570 L
Propulsion provided by: DIESEL 250 HP x 2

Customized for each customer, built for extreme weather conditions and rough usage they can meet the most critical mission requirements.

Product Range

Length Overall: 8.5 – 10.0 meters

Beam Overall: 3.0 – 3.2 meters

Construction: GRP

Range: 240NM

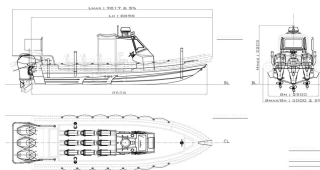

Top Speed: 45 - 50+ knots

Cruise Speed: 35 knots

Dry Weight : 2.4 – 3.5 Ton

Capacity: 570 – 600 L

Propulsion provided by: DIESEL 250 – 300 HP x 2

Patrol boat RHIB 10M

Designed for Speed, Versatility and Mission Reliability.

The Emergency Response Boats range has been designed to meet the specific requirements of search and rescue organizations. Offering a very light weight and compact boat, while providing rescue teams with a rapid deployment system that takes just a few minutes. Our Patrol boat is characterized by their performance hulls and by their sheathed foam collar fendering system that provides impact protection during docking, boarding, or alongside maneuvers.

This design are currently in service with the Korea Ministry of Oceans and Fisheries.

3D CONFIGURATOR
: Colors, Equipment, Engine, etc.

Length Overall: 10.0 meters
Beam Overall: 3.0 meters
Construction: GRP + EVA Solid Foam Fender
Top Speed: 45+ knots
Cruise Speed: 35 knots
Dry Weight : 4.0 Ton
Capacity: 500 L
Propulsion provided by: DIESEL 300 HP x 2

Patrol boat RHIB 7.7M

Designed for Speed, Versatility and Mission Reliability.

The Emergency Response Boats range has been designed to meet the specific requirements of search and rescue organizations. Offering a very light weight and compact boat, while providing rescue teams with a rapid deployment system that takes just a few minutes. Our Patrol boat is characterized by their performance hulls and by their sheathed foam collar fendering system that provides impact protection during docking, boarding, or alongside maneuvers.

This design are currently in service with the Korea Ministry of Oceans and Fisheries.

3D CONFIGURATOR
: Colors, Equipment, Engine, etc.

Length Overall: 7.7 meters
Beam Overall: 2.9 meters
Construction: GRP + EVA Solid Foam Fender
Top Speed: 40+ knots
Cruise Speed: 30 knots
Dry Weight : 2.5 Ton
Capacity: 250 L
Propulsion provided by: GASOLINE 200 HP x 2
